What is Thalassemia

Thalassemia is a group of inherited blood disorders characterized by mild to severe anemia caused by hemoglobin deficiency in the red blood cells. In individuals with thalassemia, the production of the oxygen-carrying blood pigment hemoglobin is abnormally low. There are two main types of thalassemia: alpha thalassemia and beta thalassemia. In each variant a different part of the hemoglobin protein is defective. Individuals with mild thalassemia may be practically symptom-free throughout their lives. Intermediate to severe cases are associated with a variety of symptoms, such as anemia, enlarged liver and spleen, increased susceptibility to infection, slow growth, thin and brittle bones, and heart. Thalassemia is a preventable genetic blood disorder by doing HBA2 testing before marriage.

Demographic & Statistical Data

President Message

Dear All,

As a part of TSCS, the success and the true sense of making a difference lies in our belief which takes only an honest thrive by a few committed people like you to make a considerable amount of difference in the Society. Today we are growing only with a vision to give back to the society. We are building our own infrastructure for a bigger calling, of serving the underprivileged with a hope to reduce the suffering and providing a better life- style to the thalassemia affected individuals and their families. We absolutely couldn't have done it without you, nor can we take the next steps without your help. I hope you'll keep upholding as we see life's transforming and suffering eased.

Thanking all who have partnered with us in our success.

Yours in solidarity,
Chandrakant Agarwal
President—TSCS

Chandrakant Agarwal
President—TSCS

Secretary Message

Dr. Suman Jain
C.M.R.O & Secretary—TSCS

TSCS has made great progress in giving a better life to the thalassemia affected, year after year. This successful and consistent contribution is worth celebrating. We believe that all of this is done due to your genuine interest in the right spirit and action.

TSCS is looking to scale up in giving the best-in-class service to the patients. In continuation to keep up our commitment to serve, a few steps in pipeline are a new building, new collaboration and new research. We are agile in our thinking and execution, remaining strongly aligned to our motto.

With the ongoing support of our Donors, Partners, Board Members, Volunteers and Staff, TSCS is ready for the challenge ahead.

With deep appreciation

Yours in solidarity,
Dr. Suman Jain
C.M.R.O & Secretary—TSCS

Treatment

Thalassemia major should be diagnosed as early as possible in order to prevent growth restriction, frail bones and infections in the first year of life. The infant's haemoglobin levels and development should therefore be monitored closely. If Hb is lower than 70% or the child shows signs of poor growth and development, regular transfusion is the treatment of choice. According to the WHO, the aim of this treatment is to retain a median haemoglobin value of 9-10 gm/dl. This can usually be achieved by carrying out transfusions of concentrated red blood cells at intervals of every three to four weeks.

Today thalassemia major can be cured by Bone Marrow transplantation. A prerequisite is usually that the affected individual who has siblings with identical tissue type (HLA type) a transplantation of blood stem cells referred to as a "bone marrow transplant", can be carried out.

Non-transfusion dependent Thalassemia (NTDT) is a special entity which needs treatment regularly. It includes BETA thalassemia intermedia, E BETA thalassemia & Sickle BETA thalassemia. These children need to be follow-up regularly with pediatrician and hematologist. They have to maintain hemoglobin 7gm % and iron chelating therapy when ferritin is 800 ng/ml.

Facts About Thalassemia

- ▲ Thalassemia is a serious Inherited Preventive Blood Disorder
- ▲ 4.5% of world population (250 million) is thalassemia minor
- ▲ There are over 35 million Indians are carriers of the abnormal Gene for Thalassemia
- ▲ It is estimated that about 100,000 infants are born with major Haemoglobinopathies every year in the world
- ▲ 10,000 -12,000 Thalassemia children are born every year in our country
- ▲ Survival depends upon repeated blood transfusion & costly medicines
- ▲ Thalassemia can be prevented by awareness, pre-Marital / pre-conceptual screening followed by antenatal diagnosis is required
- ▲ A simple test called HBA2 which costs Rs.500/- can give a very clear picture of a Thalassemia carrier status (HbA2 >3.5gm%). Preventing marriages between carriers will eradicate this disorder. Else, on an average expense of around 40 Lakhs is required to take care of the thalassemia patient assuming the average life is 40-50 years

Management Of Thalassemia

- ▲ Saline washed packed red cell blood transfusions every 3 – 4 weeks to maintain hemoglobin 9-10 gm/dl
- ▲ Iron Chelation therapy after 15 blood transfusions
- ▲ Periodic medical check up for serum ferritin level, liver function test & screening for hepatitis B and C, HIV, renal function tests, serum calcium & phosphorus level, dental check-up, cardiac check-up and endocrine function tests
- ▲ Bone marrow transplantation can cure the disease but, probably, only 30% of siblings have Histocompatibility Linked Antigen (HLA) matched donor.

What is Sickle Cell Anemia ?

Sickle cell disease is an inherited disorder in which red blood cells (RBCs) are abnormally shaped. All the problems in sickle cell disease are due to its shape, which resembles a shaped farm tool called a sickle. Normal red blood cells are flexible and flow easily but in sickle cell disease due to its deformity, they are stiff and can get stuck in a tiny blood vessels cutting off the blood supply to nearby tissues.

This abnormality can result in painful episodes, serious infections, chronic anemia, and damage to body organs.

These complications can, however, vary from person to person depending on the type of sickle cell disease each has. Some people are relatively healthy and others are hospitalized frequently.

Today with early diagnosis and treatment, most kids born with this disorder grow up to live relatively healthy and productive lives.

Treatment

The goals of Sickle Cell treatment are symptom management and management of disease complications. These include management of vasoocclusive crisis, management of chronic pain syndromes, management of chronic hemolytic anemia, prevention and treatment of infections, management of complication.

Pain Control

There are a variety of approaches that can be used to treat pain associated with Sickle Cell Anemia. They included such medications as paracetamol, codine and tramadol. Consult your physician before beginning any medical regime. The addition of tricyclic antidepressants may reduce the dose and need for opiates by interfering with pain perception. Some patients with chronic pain can become depressed and managing depression has a statutory effect on the pain. There are also a variety of non-pharmacological approaches including support groups, heat and cold applications, acupuncture and acupressure hypnosis and transcutaneous electric nerve stimulation (TENS).

In addition, a mild antibiotic regimen is suggested for children, especially for those between the ages of 4 months to 5 years.

About Society

Thalassemia & Sickle Cell Society (TSCS) is a registered NGO (Reg. no. 5359 Dt. 22/10/1998) and voluntary organisation established in 1998, is the only place in the state of Telangana & Andhra Pradesh wherein a Transfusion Centre with attached Blood Bank is managing the treatment of blood disorders - Thalassemia & Sickle Cell Anemia in Hyderabad. Our objective is to increase the life expectancy and enhance the quality of lives of all Thalassemic patients. At present 2387 patients, are being served under one roof, a unique, and unmatched feat in the whole world. Primarily we serve Thalassemic patients by providing them free saline washed blood and free medical check up. The society is continuously running preventive awareness programmes in all available forms. Hospital, Blood Bank, Diagnostic Lab, and Research Lab, all under one roof, under the aegis of Society, are serving the poorest of the poor at almost zero cost, with highest standards of quality and efficiency

Vision

- ✧ To promote appropriate treatment and quality life for every thalassemia affected child.
- ✧ To give hope by providing free blood transfusion which is very vital to keep such patients alive. Regular blood transfusion to children every 3-4 weeks brings hemoglobin content to normal level.

Mission

- ✧ To promote the provision of appropriate treatment and to achieve a good quality of life for every patient with Haemoglobinopathies
- ✧ To encourage prevention policies with the aim of reducing the number of newly affected births
- ✧ To promote research activities for bringing latest and affordable treatment for thalassemia & sickle cell patients
- ✧ To reach the underprivileged and lower social economic groups with free blood transfusion

Our Team

GOVERNING BODY & ADVISORY BOARD

Mr. Naresh Rathi
Chief Patron

I Believe: Very little is needed to make a happy life; it is all within yourself, in your way of thinking.

Mr. Pradeep Uppala
Chief Patron

I Believe: We are constituted so that simple acts of kindness, such as giving to charity or expressing gratitude, have a positive effect on our long-term on all the patients.

Mr. Chandrakant Agarwal
President

I Believe: We must value life and treasure each breath we take. We must also value each person and touch others lives every day.

Mrs. K Ratnavalli
Vice-President

I Believe: A little thought and a little kindness are often worth more than a great deal of money.

Dr. Suman Jain
Secretary

I Believe: If we all take care of one another and go the extra mile to help and work together, we all gain each one of us is lifted up

Mr. M A Aleem Baig
Joint Secretary

I Believe: Goodness is about character integrity, honesty, kindness, generosity, moral courage, and the like. More than anything else, it is about an act of care for other people.

Mr. Manoj Rupani
Treasurer

I Believe: My religion is very simple. It is all about kindness & care.

Mrs. Rama Vuppala
Joint Treasurer

I Believe: What you do for others makes more impact on your life than what you do for yourself.

Dr. D Venkata Ramana
Executive Member (Former President)

The best and most beautiful things in the world cannot be seen or even touched they must be felt with the heart.

Dr Shailesh Singi
Executive Member

In the end, its not the years in your life that count. Its the life in your years what you did to make a difference in others life

Dr. J Rajeshwar
Advisory Board

I Believe: Here are the values that I stand for: kindness, compassion, treating people the way you want to be treated and helping those in need.

Dr. Sirisha Rani
Advisory Board

I Believe: Lifes most important question is: What are we doing for the society ?

Our Staff

**DEDICATED STAFF**

Milestones

- ▲ Formation of Society, Free Transfusion Facility & Medical Consultation, clinical research – 1998
- ▲ Availability of Free Blood with support from Red Cross, Lions & Chiranjeevi blood bank – 2001 till 2010. Since then society is providing free blood to patients
- ▲ Prenatal Diagnosis in partnership with Fernandez Hospital, NIMS Hospital, CDFD, CCMB, Institute of Genetics – 2002
- ▲ Periodic Medical Check up & Laboratory Investigations – 2003
- ▲ Research Collaboration on Genetic analysis on Thalassemia patients with CDFD – 2005
- ▲ Research collaboration with Institute of Genetics on Biochemical & Genetic aspects – 2009
- ▲ Establishment of our own blood bank – 2010
- ▲ Establishment of biochemical and clinical pathology lab; NACO recognition for the blood bank – 2011
- ▲ Research collaboration with CODEWEL Nireekshana on neuropathies and ultrasonography studies in nerve damage – 2009 and National Institute of Nutrition (NIN) - 2014
- ▲ Recognition by SIRO for research in 2014
- ▲ Aarogyasree scheme for white card holders – 2014

Facilities

DAY CARE TRANSFUSION UNIT WITH 30 BEDS

- ▲ Provide saline washed blood and Transfusion services
- ▲ Subsidy on Iron chelating drugs (Kelfer, Asunra)
- ▲ Counseling
- ▲ Periodic Medical check-up by specialists

A FULL-FLEDGED AND WELL EQUIPPED BLOOD BANK FUNCTIONING ROUND THE CLOCK

- ▲ Every unit of blood donated or collected is tested for major infections like Hepatitis B, Hepatitis C, Malaria and HIV
- ▲ Ensuring optimal utilization of blood by preparing blood components
- ▲ Provide properly grouped and cross-matched blood to Thalassemia patients and other patients

COMPUTERIZED DIAGNOSTIC SERVICES

- ▲ Offers wide range of laboratory testing services in Biochemistry, Clinical Pathology, Hormonal assay, Microbiology, Hematology, etc.
- ▲ Lab services to Thalassemia patients at nominal price

Services

RESEARCH

Kamala Hospital & Research Center for Thalassemia & Sickle Cell Society

Society has been actively supporting research activities for improving patients treatment and in identification of mutations status. For HLA typing and later to guide patients for a permanent cure like bone marrow transplantation(BMT), gene therapy, etc.,

COUNSELING

Bringing up a Thalassemia child is very traumatic and emotionally draining experience. The parents and family need a strong emotional support to lean on. For the past 15 years Thalassemia & Sickle cell society has been a pillar of strength to parents and family members. The society has been successful in giving hope to its members through its programs and activities.

Genetic Counseling : Screening programs to test the thalassemia status of individuals is undertaken by the society with the support of interested organizations and foundations. The Thalassemia and sickle cell society had done screening in more than 1000 school going children in various schools.

BLOOD BANK

Vuppala Venkaiah Memorial Blood Bank for Thalassemia & Sickle Cell Society

TSCS blood bank was launched in March 2010 keeping in mind the need for safe Blood for our very own thalassemia kids. This is one of the major effort to keep the children away from any issues arising cause of unsafe blood transfusion.

We are counted among best NGO-run blood bank. We have a better number of voluntary donations from various organizations. Our prompt and proactive actions for blood safety and maintain better quality of components. TSCS Blood Bank supports internally for almost 1000 Thalassemia infected kids and also need for the nearby hospital requirement on daily basis.

DIAGNOSTIC SERVICES

Vuppala Krishna Rao & Chandrakala Diagnostic Services for Thalassemia & Sickle Cell Society is established in September, 2011 offers facilities for carrying out Laboratory investigations with the advanced technology in the diagnostic field.

We have wide range of laboratory testing services in Biochemistry, Clinical Pathology, Hormonal assay, Microbiology, Hematology, Histopathology, ECG & Clotting Factors. The Lab has high quality precision equipment's that provide qualitative and quantitative methods of analysis of biological fluids such as blood, serum, tissue, urine, stool etc.

Diagnostic Center functions from 8.00 AM to 9.00 PM all 365 days. The sample collection can be arranged from bed-side patients within a range of 5 kms with prior appointment. Thalassemia & Sickle Cell Society is committed to provide affordable laboratory testing services to all members of the communities.

- ▲ Research Center
- ▲ Free blood transfusion center
- ▲ Pre-transfusion Hb and other investigations
- ▲ Free consultation and genetic counseling
- ▲ Regular Growth monitoring
- ▲ Hepatitis-B vaccination at subsidized rates
- ▲ Serum ferritin level at subsidized rate
- ▲ A2 level screening for Thalassemia traits with Bio-Rad Column/HPLC
- ▲ Chelation drugs at subsidized prices
- ▲ HLA Matching in collaboration with Datri Foundation
- ▲ Hb A2 Testing at Subsidized rates

AAROgyaSRI

Aarogyasri Scheme is a unique Community Health Insurance Scheme being implemented in TSCS. Aarogyasri is the flagship scheme of all health initiatives of the State Government with a mission to provide quality healthcare to the poor.

The scheme provides financial protection to families living below poverty line with white card up to Rs. 2 lakhs in a year for the treatment of Thalassemia affected children. The objective of the scheme is to improve access of below poverty line families to quality medical care for treatment of Thalassemia disease involving hospitalization, surgeries and therapies at Kamala Hospital & Research Center (KHRC) a Unit of TSCS.

This Scheme is an effective model to enable the poor families to avail quality medical treatment in a cashless manner. Till now we have 451 families who are benefitted in our society. All transactions are cashless for covered procedures.

Free Breakfast, Lunch and Transportation charges, free consultation Counseling, investigation, blood transfusion and free medication

Testimony of Aarogyasri Scheme Beneficiary :

Working as a Courier delivery man it was beyond my reach as I have two son (Yashwanth – 16 & Dhanush -14) suffering with Thalassemia, it was hard to purchase those high cost medicine each month at times I had gone on debts to get the basic requirement.

From last 1.5 years I am getting free medication through Aarogyasri through TSCS that has brought lot of my burden down. My sons are in better shape than before and their health has also improved.

Father-Jagdesh

Periodic Medical Checkups

Dr. **Sirisha**, Pediatric Hemato-oncologist

Dr. **Anuradha**, Ophthalmologist

Dr. **Jain**, ENT specialist

Dr. **Srinivas Namineni**, Dentist

Dr. **Nageshwar Rao**, Pediatric Cardiologist

Dr. **K Nagarjuna**, for doing surgery at Gandhi Hospital

Dr. **A Narender**, Pediatric Surgeon

T H A N K Y O U

to team of doctors for rendering
their free services to our children:

Kamala Hospital & Research Centre

Vuppala Venkaiah Memorial Blood Bank | Vuppala Krishna Rao & Chandrakala Diagnostic Services

Achievements Of Society

- ▲ Free blood transfusion
- ▲ Free periodic medical check-up with multi-speciality doctors
- ▲ Establishment of blood bank in 2010 providing free blood to the Thalassemia children
- ▲ Research collaboration with institute of genetics and CDFD
- ▲ Enrolment of Aarogyasri scheme to give free iron chelating drugs to 421 Thalassemia children
- ▲ To facilitate for establishing prenatal diagnosis centre in Hyderabad with the help of Fernandez hospital and CDFD
- ▲ Received award of excellence from NBTC and NACO for working towards 100% voluntary blood donation on 14th June 2016 and also from the TSACS in 2015
- ▲ Since establishment of blood bank, issued more than 75,000 units free blood to Thalassemia children
- ▲ Every month 1000 to 1200 Thalassemia effected children are taken care
- ▲ We have computerised data of 2303 patients which can be utilised for scientific research
- ▲ Received a land at Shivrampally on nominal lease for constructing four storey building to have all the services under one roof

Testimony - Thalassemia & Sickle Cell Society

As a single mother bringing up two children is difficult but not impossible. Circumstances become twice more challenging when they are thalassemia affected and both daughter and son has no one else to look at except their mother. My husband left putting the allegation that the disorder is cause of me and not him.

“Thalassemia”, In fact, this term describes a blood disease that is carried by over sixty million people in the world. But thalassemia alone isn't what made my two daughters genetically unique. No, doctors discovered soon after they were born that they had the worst form of thalassemia, the form that affects only few thousand people in Telangana, the form that renders the victim helpless and completely dependent on blood from other people: beta-thalassemia major. The innocent, happy life of my children came tumbling down around me with this medical discovery.

Am I Up for the Challenge?..... The short answer is yes. This does not mean compromising my parenting. It does mean keeping myself as grounded and as stress free as possible so I can give my daughter the wonderful childhood they deserve. One way to calm myself: taking life one step at a time. I have no long-term planning or strategy during these few years of my kids.

The circumstances I have been as a single parent has prepared me for any number of uncomfortable situations, from disapproving, gossiping, anger, stress etc. But beyond that there is also the beauty that emerges from the strain, the impediments, even sometimes those terrifying situation where I could go helpless knowing as mother I might fail them. No single mom wants to fail them—provide less, teach less, support less, be less—but it is in our minds that we might. So we struggle, and over the long term, we impart to our children that struggle can be good. This is something they know intimately.

Now my both kids daughter-Shagufta 13 & son-Abdul 11 have grown in the absence of their father who left them when Shagufta was hardly 6 years and Abdul was 4 years. Working as a teacher in a private school hardly pays off to meet the whole requirement of the family. In the midst of the struggle

Thalassemia is a daunting disease. The victim must receive blood from donors, but in doing so he receives an excess of iron through the transfusion. The very process that is saving his life is killing them. Though there are drugs that help patients excrete iron. TSCS supports both the kids with their thalassemia health requirement medication through Aarogyashree. TSCS stands as a great help both emotionally & mentally through their various counseling and support programs. I am able to cope from this situation of thalassemia & single parenting because of good people like them.

There is something I want you all to take away today from my experience, since I'm not just up here to say my life story. Always embrace obstacles, for obstacles are actually valuable lessons.

Events & Activities

8th Jan 2017	Raising Children with Thalassemia at Little Star Childrens Hospital, Punjagutta, Hyderabad. Attended by Dr.Suman Jain, Dr.Saroja, Mrs.Ratnavalli, Mr.AleemBaig and Sister Soubhagyavathi
11th Jan 2017	Awareness Talk about Thalassemia and Blood Donation was given by Dr.Suman Jain and Dr.Saroja at Tata Projects.
26th Jan 2017	Republic Day Celebration at Society
8th Mar. 2017	Team from Global IT through Cocern India foundation visited our society to see the progress of their project.
10th Mar 2017	CAF India Gaye Cluster Meeting at Tristar Secundrabad . Attended by Dr.Suman Jain and B.Anil Reddy
10th Mar 2017	Awareness Talk on Thalassemia at Keyes Junior College by Dr Suman Jain in collaboration with Lions Clubs of Secundrabad, Vivekanadapuram
07th May 2017	On the event of Thalassemia Day Picnic was organised for Thalassemia Patients Sponsered by Mr.Surendra Agarwal to Leonia Ressorts Hyderabad.
20th & 21st May	Defrijet Conclave Conference at Mahabalipuram, chennai Attended by Dr Suman Jain & Dr Saraoja. Dr Suman Jain Talk on Dignostic Dilamma in Thalassemia Major: Rare Mutation in IVS II
11th to 14th July	NACO Training on Quality Management of Blood Bank at TTK Blood Bank Banglore attended by Dr suman jain and Khader
15th July 2017	"Thal Beats" Musical Live in Concert was organised at Satya Sai Nigamagamam, Srinagar Colony Hyderabad. Activities like Awareness on thalassemia, Fund Raising, Free HPLC and HLA Typing was arranged
20th July 2017	Dr Suman Jain attended Round table conference held with Face book about the responsibilites and challenges of blood donations in india at Trident hotel, Hyderabad
14th Aug 2017	Lecture given by Dr Suman Jain on Thalassemia Major and Sickle cell Disese and activities of TSCS and Mrs Ratnavalli Spoke on parents perspective about thalassemia at Gandhi Hospital
15th Aug 2017	Flag Hoisting @ Society By Board Members,Staff and Thalassemia Patients

Events & Activities

01st Sept 2017 Awareness Talk on Thalassemia and sickle cell disease at Army Welfare Society for Soldier was given by Dr.Suman Jain

09th Sept 2017 Dr Suman Jain attended "Tranfusion Medicine Update" at Basavatarakam Indo-American Cancer Hospital & Reaserach Institute.

19th Sept 2017 Dr Lawrence Faulkner visit to B.Narayan Das Trust at shivarampally along with Board Members and Dr.Shailesh Singhi

22nd Sept 2017 IDC GIVING CAMPAIGN 2017 (Microsoft -Hyderabad) - Attended by Dr.Suman Jain and Dr Saroja

13th Oct 2017 Training via Web Cast by Novartis India Ltd on Iron chelation in Thalassemia attended by Thalassemia Sickle Cell Society Staff

15th Oct 2017 Dr Suman Jain gave a presentation on "Blood Transfusion in Thalassemia" during National Training Programme on Practical Peditatic Hematology at Rainbow Hospital Hydreabad

24th Oct 2017 Awareness and Prevention Talk on Thalassemia By Dr Suman jain at St.Anns college Malkajgiri, Hyderabad

12th Nov 2017 Children's Day Celeberation at Agarwal Siksha Samithi Bhagvan Das Mandapam. Organised in collobration with Sun Pharma Laboratories Ltd

14th Nov 2017 TSCS Patinets and Staff Attended the Childrens Day Programme Organised by GOOGLE India, hyderabad

24th & 25th Nov 2017 At Unani Hospital during "Impact of Bio Markers for Clinical and Environmental application for Sustainable Development" Dr Suman Jain gave talk on " Genetic Basis Pathophysiology and Dignosis of Thalassemia"

2nd Dec 2017 Milad Blood Donation Camp at Library Afzalgunj, Hyderabad

3rd Dec 2017 Dr Suman Jain gave presentation on " Role of Transfusion Medicine in Thalassemia Management" at RDT Hospital Bahtalapalli, Ananthapur District

7th Dec 2017 A Team from Happy Tree Organisation from Hong Kong visited the Society
