

Thalassemia and Sickle Cell Society

From Regular Transfusions to a Life of Service: Jairam's Inspiring Journey

By Priyadarshini

Jairam's story is one of resilience, determination and the power of continued care.

Jairam was born into a financially disadvantaged family in Wanaparthy District, Telangana. His father, **Krishna**, worked as a daily-wage labourer, while his mother, **Anji Bai**, was a homemaker. His parents are from a consanguineous marriage.

As their first child, Jairam was diagnosed with **Beta-Thalassemia during childhood**. At that time, his parents had little awareness about the condition and its long-term implications. Doctors counselled the family about his condition and explained the importance of regular treatment and follow-up.

Initially, Jairam received treatment at **Niloufer Hospital, Hyderabad**, for around six months. He was subsequently referred to the **Thalassemia and Sickle Cell Society (TSCS)** for specialised and continued care.

Jairam joined TSCS in **2003** and has been receiving care from the Society for more than **22 years**. Over the years, TSCS has supported him with regular blood transfusions, medical check-ups and free medicines, helping him continue his treatment despite the financial challenges faced by his family.

Turning Challenges into Achievements

Living with Thalassemia did not stop Jairam from pursuing his dreams. Despite the demands of regular treatment and blood transfusions, he continued his education and successfully completed his **12th standard and D.El.Ed. (Diploma in Elementary Education)**.

His determination eventually opened a new chapter in his life. In **2024**, **Jairam successfully qualified in the TGDSC recruitment examination and was selected as an SGT (Secondary Grade Teacher)**. He is currently working as a **Government Teacher in Hyderabad, Telangana**.

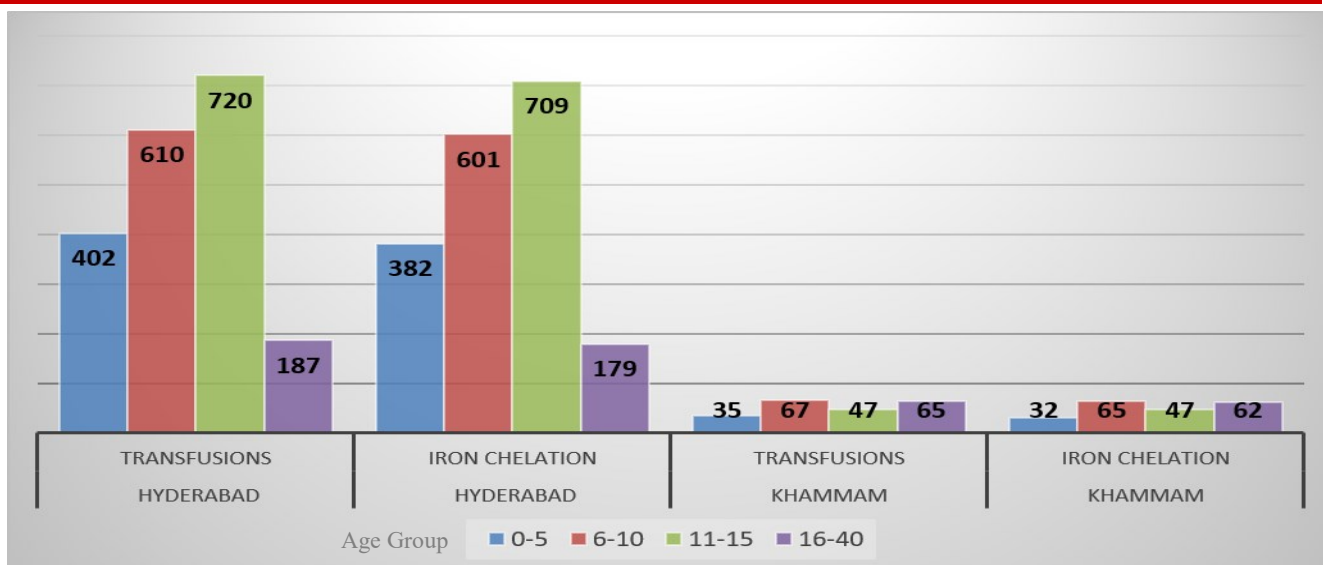

A Journey of Hope and Determination

Jairam's journey reflects the importance of **continuous medical care, family support, counselling and access to essential treatment** for people living with Thalassemia. From a child dependent on regular transfusions to a qualified professional serving as a Government Teacher, his story demonstrates that with the right support and determination, individuals living with Thalassemia can pursue their education, build careers and contribute meaningfully to society.

Today, Jairam continues to inspire others through his journey—from receiving care to becoming a teacher and serving the community. His story is a reminder that Thalassemia may be a lifelong condition, but it need not define a person's aspirations or achievements.

Blood Transfusion and Iron-Chelation Details at Hyderabad and Khammam
